**10-HOUR OSHA General Industry
SAFETY & HEALTH
OUTREACH TRAINING COURSE (English & Spanish)**

This 10-hour **OSHA** program is intended to provide instruction on a variety of General Industry **SAFETY & HEALTH** topics to both entry and experienced level participants. This is an excellent course for new as well as experienced safety & health safety coordinators, safety officers, managers, supervisors, safety committee members, human resource managers lead foreman, employees and anyone else who has the safety responsibility within your organization and who want to improve their safety and health awareness and knowledge. The 10-hour classes are designed to be presented to workers, therefore they must emphasize hazard identification, avoidance, control and prevention, not OSHA standards

Course Title: 10-Hr General Industry Safety and Health Outreach Program

Course Objectives

Participants will gain the following knowledge:

1. Provide instruction on a variety of construction industry safety and health standards to both entry and experienced level participants.
2. Describe the Occupational Safety and Health Act, 29 CFR 1926.
3. Identify the common causes of accidents and fatalities in hazardous areas of General Industry.
4. Be able to take back and implement important safety information to benefit in the prevention of General Industry Hazards and Accidents.

Upon successful completion of the course participants will receive:

- A student handbook/ handouts
- A 10-hour course completion card
- A certificate of completion
- Sufficient knowledge and skills to conduct safety training within their own organization
